## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed "a claps, or pin" recited in claim 7 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Turner (US 2,419,509). Turner discloses smoking pipe having a camouflaging external body (4), see figure 1. The claimed receptacle concealed in the camouflaging body is fire bowl (7) removably fitted inside the smoking pipe (Col. 2 Lines 7-10). The claimed mouth-piece in communication with the receptacle is deemed as stem (12) which functions as a mouthpiece. Additionally, the claimed screen and filter is the lateral portion of fire bowl (7) (the claimed screen receptacle) having holes 8 and replaceable

Art Unit: 1731

(19) respectively. During working condition of the smoking pipe a smoking mixture is placed in the screen receptacle in order to be smoked by the user.

As for claim 4, as shown in figure 4 the smoking pipe includes a hollow interior in which the screen receptacle is placed and is in communication with the mouth-piece (12).

As for claim 5, the smoking pipe includes drip pan (15) having convex shape enables it to hold a liquid.

As for claim 8, as shown in figure 4 the screen receptacle is formed in a funnel shape.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner (US 2,419,509). Claims 21-28 are directed to the smoking mixture of the placed inside the fire bowl (7). Turner is silent disclosing the shape that the smoking mixture would take once placed in the fire bowl (7). However, at the time the invention was made, it would have been obvious to one of ordinary skill in the art that the smoking tobacco compacted in fire bowl (7) would take shape of the fire bowl itself, meeting claims 23-24 and 26-27. Thus, the claimed spherical constitution is considered as the smoking tobacco when placed inside the fire bowl (7), which would have a plurality of air

voids as recited in claim 22. As for claim 28, the smoking mixture is considered to be in packing form when placed inside the fire bowl (7).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References in PTO-892 have been cited to show the state of the art.
